

# Here for an optimal transplant testing experience

With transplant shipper kits from Quest Advanced Specialized Transplant Services, you have a simple, convenient way to screen for infectious disease in donors and post-transplant recipients.

## Streamlining the testing experience for care teams and patients

Our shipper kits are critical to expediting turnaround times and delivering results when every hour counts. **You can choose from multiple ways to initiate the testing process:**

- 1** Order shipper kits to be delivered directly to patients, who then bring them to a Quest Patient Service Center (PSC) for blood draw.\*
- 2** To ship multiple patient collections in 1 box from a providers office, order the multiple patient shipper kit
- 3** Alternatively, for single patient collections from a providers office, order individual patient shippers

Collection criteria - **Monday-Friday, prior to 1PM**. Do not draw the day prior to a holiday.

Scan to watch a detailed demonstration of how to collect transplant testing packs in your office.

\*Appointments aren't required, but are highly encouraged.

# Dedicated service for you. Convenience for your patients.

As part of our end-to-end specialized transplant testing services, shipper kits deliver vital insights with little-to-no hassle.

## For providers:

- Dedicated customer service team
- Specimen tracking
- Rapid turnaround times
- Patient engagement via email and phone by our customer service team

## For patients:

- Shipper kits that can be delivered to their door
- Easy access to draw sites through Quest's PSC network
- Reminders to help them stay compliant and take part in critical testing

## Each shipper kit includes the necessary items and instructions for specimen handling, packing, and transport.

To utilize a patient service center, mail-to-home shipper kits should be ordered through your LIS/EMR or Quanam.

Test name	Test code
Mail to Home Kit, Specialized Transplant Services, Post-Transplant	10696
Mail to Home Kit, Specialized Transplant Services, Donor	10697

To stock packs in your office, place a supply order.

Product name	Product ID
Specialized Transplant Services, Single Testing Pack	Donor transplant: K177 Post-transplant, CHY: K178 <sup>a</sup> Post-transplant, SJC: K179 <sup>b</sup>

<sup>a</sup> North, East, SE, GMW

<sup>b</sup> SW and West

**Here for the transplant testing experience you need.** Contact your local Quest Diagnostics representative to discuss the option that works best for you.

Specialized transplant testing packs are not at-home collection kits. In all use cases, a physician places the order and chooses where the packs are delivered. Patients do not order mail-to-home packs themselves.
